

**Report Description:**

This PDF report presents a QA summary for the sprint, including the number of test cases (manual and automated), execution results, bug distribution by severity, and key suggestions. This Report provide a visual overview of testing progress and defect trends, along with the attached summary details.

| QA Summary Report    |                                       |
|----------------------|---------------------------------------|
| Project Name         | MyProject                             |
| Sprint Name          | Sprint-12                             |
| Sprint Start Date    | Tue Jul 01 00:00:00 IST 2025          |
| Sprint End Date      | Tue Jul 15 00:00:00 IST 2025          |
| Total Test Cases     | 4                                     |
| Automated Test Cases | 2                                     |
| Manual Test Cases    | 2                                     |
| Stories Delivered    | 3                                     |
| Total Bugs           | 4                                     |
| Critical Bugs        | 2                                     |
| Major Bugs           | 1                                     |
| Minor Bugs           | 1                                     |
| Test Coverage (%)    | 50.00                                 |
| Bug Density          | 1.33                                  |
| Sprint Velocity      | 3                                     |
| Suggestion 1         | Improve unit test coverage            |
| Suggestion 2         | Automate smoke test suite             |
| Suggestion 3         | Address critical bugs early in sprint |
